Sprint 3 Report
FantomCMS
Honey Badgers Inc
12/10/14

Actions to stop doing:

During this sprint, several commits were made to the master branch that we assumed would not cause any issues. However, they did end up having inadvertent effects and reduced overall productivity. We need to stop making pushes directly to master without thorough testing. Lastly, we need to stop waiting until the last minute to completely sprint tasks.

Actions to start doing:

As we moved into testing our product, we found that developing complete test solutions after the programming had been completed was difficult. We would like to begin writing our tests before/as the product is being developed in order to ensure that our product meets our reliability expectations. We would also like to have intermediate deadlines for various tasks to better facilitate cohesion between dependant tasks of the sprint.

Actions to keep doing:

Working together in the group room continues to be very effective for our group. By keeping the Scrum Board and Burnup Chart updated, we have been able to keep track of our progress on the project, and address potential issues as they arise. Additionally, continuing to bring up problems early in Scrum Meetings has allowed us to avoid many issues.

Work completed:
- (10 pts) – As a content manager, I want to be able to add, remove and edit the users on my website and give them app permissions.
- (5 pts) – As a content manager, I want to be able to further control the colors of the website as well as be able to control text styles.
- (5 pts) – As a content manager, I want to be able to have inline content on my static pages.
- (8 pts) – As a content manager, I want to be able to have many options for displaying pictures.
- (8 pts) – As a content manager, I want to be able to show a gallery of multimedia to the viewer.
- (1 pts) – As a developer, I want to ensure my changes maintain functionality.
- (1 pts) – As a developer, I want to maintain an organized structure between my fellow developers.
- (5 pts) – As a user of the system, I must be able to read the user manual of the FantomCMS.
- (13 pts) – As a tester, I need to be able to do software builds and run regression tests.

Work not completed:

- (8 pts) – As a content manager, I want to have a rich audio playing experience which is well integrated into the single page environment.
- (13 pts) – As a content manager, I want to have a rich demo which will entice me to use this product.

Work completion rate:

- **Total User Stories Completed:** 9 / 11
- **Total Estimated Ideal Work Hours Completed:** 46 / 83
- **Total Number of Days in this Sprint:** 29 days
- **User Stories Per Day:** 0.31
- **Ideal Work Hours Per Day:** 1.59
